

Capitalize on a Wide Array of VoIP Revenue Opportunities

As a global leader in communications and voice technology, Net2Phone provides partners with a full range of VoIP telephony solutions.

By partnering with Net2Phone, you can benefit by delivering low-cost calling services to individuals and businesses worldwide.

Profit from our:

- *Broadband Telephony Services*
- *Corporate/Enterprise Solutions*
- *Calling Card Programs*
- *Carrier Opportunities*

Broadband Telephony Services

With our VoiceLine service, you can provide your residential and small business customers with a feature-rich, low-cost calling service and enable them to save on both inbound and outbound calling. Your customers can choose from a variety of calling plans and benefit from having a telephone number from the U.S. or another country, no matter where they reside globally.

Corporate/Enterprise Solutions

A flexible, SIP-based VoIP solution, VoiceDirector can be implemented as a standalone IP-PBX or added to an existing PBX system to deliver savings to businesses worldwide.

Calling Card Programs

Establish your own branded calling card service or leverage our name recognition by offering a Net2Phone branded calling card. Provide either a prepaid or postpaid calling card service.

Carrier Opportunities

Increase your margins and overall revenue by terminating Net2Phone's international traffic in your country. Lower your costs by partnering with Net2Phone to terminate your international traffic.

"Our partnership with Net2Phone will allow for us to bring exciting new products and benefits to our customers."

***- Timothy Adam, Chief Executive
Cable & Wireless Cayman Islands***

Target a Wide Array of Customers with our Full Range of VoIP Telephony Solutions
